Assignment - 2 (SDLC)

- Mock Interview Summary (Key points):
- Target Users: Local community members, event organizers.
- Core Features:
 - Create and manage public/private events
 - RSVP and attendance tracking.
 - Location integration via map APIs.
 - Push email notifications.
 - Volunteers co-ordination tools.
 - Admin dashboard with analytics.
- Non functional Requirements:
 - Mobile responsiveness.
 - Multilingual support.
 - GDPR-compliant data handling.
 - Scalability for multiple regions.
- Documentation Approach:
 - Requirement Specification Document (RSD) - Includes function/non-functional requirement, use cases.
 - Traceability Matrix - Links each requirement to its corresponding design, implementation and test case to ensure completeness.
 - User personas and Scenarios - Help developer understand typical user need.

Summary Note :- Clear requirement gathering and documentation will ensure the app meets user expectations, reduces scope creep and aligns with the SDLC phase efficiently.
